

Documentation currently undergoing maintenance

The information supporting the workshop you have chosen to view is currently under construction.

Please contact us for the latest in the development of our workshops and how we can possibly tailor a workshop or curriculum to suit your specific environment.

Special Features

When you attend this workshop you will receive:

- A comprehensive workshop workbook including all tools and templates used during the workshop
- A certificate of completion

This workshop can be facilitated using your own project as a case study, therefore utilising best practice project management practices, tools and techniques to kick off your project.

An information gathering technique (Nominal Group Technique - NGT) is used at the conclusion of each days training to compile a prioritised list of the project management concepts, tools and techniques. This list is identified by the delegates and represents their thoughts on what they can take back to the workplace and implement into their daily work practices. This has proven to be very useful input into organisations' project management capability development programs.

Learning Method

This workshop is instructor led with limited class size. Participants undertake practical activities to ensure a discreet understanding of the tools and techniques.

Who is Using PMI?

The PMBOK® is used globally PMI® is represented on every continent and has chapters in virtually every major city in the world. The PMP® certification is a much sought after qualification and is regarded by many as the international project management accreditation.

In-House Training

This workshop is available for private corporate presentation, either on your own premises or "off-site". Please contact Workgroup Management for a quotation and to discuss your requirements.
